## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over O'Neil et al. (US Patent 5,998,551). O'Neil et al. teaches the basic method of making a medical device from a nylon block copolymer which is irradiated, particularly a flexible balloon catheter with a tubular shaft (column 4, lines 35-45). O'Neil et al. does not specifically teach that the device has a varying durometer, but does teach that the tip of the catheter is softer than the shaft (column 4, lines 35-45), which could be interpreted as varying durometer.

### *Allowable Subject Matter*

2. Claims 1-8, 10-19 and 25-41 are allowed.
3. Claims 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### *Response to Arguments*

4. Applicant's arguments, filed 9/28/07 with respect to the rejection(s) of claim(s) 1-3, 5, 6, 29, 33, and 34 under O'Neil et al. (US Patent 5,998,551) have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of O'Neil et al. (US Patent 5,998,551) as applied to claim 9.
